

ANCILLARY NETWORK

Dental program

When an employee needs dental treatment as a result of a workplace injury, our ancillary care team is here to help. Our dental experts work closely with our claims examiners and nurses to ensure injured employees receive the appropriate care.

Solutions to meet your needs

By coordinating dental care through our large network of trained providers, we can connect employees with a wide range of services while helping employers control costs.

Our team can assist with the following services:

- Completing dental evaluations and treatment
- Reviewing treatment plans for compensability on new claims
- Coordinating independent medical exams with dental providers
- Completing dental compensability and peer reviews on existing files

Through our network, we can also complete fee audits and peer reviews, and schedule second opinion examinations, periodontics and prosthodontics, as needed.

Caring for your employees

We coordinate all aspects of dental treatment for injured employees — from the initial evaluation to maintenance and patient education. Our ancillary care team supports the process by ensuring the proper documentation is received by the examiner or nurse case manager to assess the employee's injury.

Our experts will determine the appropriate treatment and providers based on the employee's needs. Our dental network includes general dentists, oral maxillofacial specialists, TMJ specialists, endodontists and orthodontists. If specialty services are needed, our team ensures the correct provider is selected the first time.

About Careworks

At the heart of any organization are its people. When one of your employees is out of work for an illness or injury, Careworks is there, ready to help them return to health, work and productivity. By providing the right care and coordination solutions — from clinical case management to networks and support — along with the best treatment and cost oversight, we're driving better outcomes for your injured workers. And that means better outcomes for you.
